

Problem 1

unusual 3

1/5 letters is u

1 2 3 4 5  
z, u, n, s, a, l

cases:

(1) Take all 5 different letters

$$\binom{5}{5} \cdot 5! = 120$$

↓  
\* ways to arrange

1 pair of the one letter that shows up multiple times

(2) 2 u's & 3 diff

$$\binom{1}{1} \cdot \binom{4}{3} \cdot \frac{5!}{2!} = 4 \cdot 60 = 240$$

(3) 3 u's & 2 diff

of the pair

ways to have 3 letters w/ 2 identical ones for of letter

$$\binom{1}{1} \cdot \binom{4}{2} \cdot \frac{5!}{3!} = 6 \cdot \frac{120}{6} = 120$$

$$= 120 + 240 + 120 = \boxed{480}$$

## Problem 2

- 2 pairs of each value  $\Rightarrow$  13 values  $\Rightarrow$  26 pairs  
+ diff from above  $\Rightarrow$  above order matters  
\* 4 cards of each value  
\* 13 diff values

$$\binom{13}{2} \cdot \binom{4}{2} \cdot \binom{4}{2} \cdot \binom{44}{1} = \boxed{123552}$$

↓                      ↘ for second  
for first value      value

### Problem 3

1 couple at one song

$\binom{16}{1} \rightarrow$  doesn't even matter bc  
always one song

stars & bars w/ rest (15 songs & 6 ladies)  
15 stars & 5 bars

$$1 \cdot \binom{20}{15} = \boxed{15504}$$

part of two node. 2 possibilities  $1_2, 1_2^2$

BST of 3 nodes:

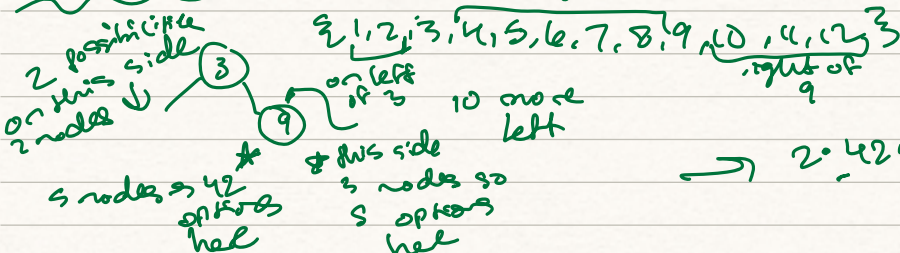

$\begin{matrix} & & 2 \\ & 1 & & & \\ & & 3 & 4 & \\ & & & 5 \end{matrix}$ 
 $\begin{matrix} & & 2 \\ & 1 & & & \\ & & 3 & 5 \\ & & & 4 \end{matrix}$ 
 $\begin{matrix} & & 2 \\ & 1 & & & \\ & & 5 \\ & & & 3 & 4 \end{matrix}$ 
 $\begin{matrix} & & 2 \\ & 1 & & & \\ & & 5 \\ & & & 4 \\ & & & & 3 \end{matrix}$

$1 \ 3 \ 2 \ 1 \ 4 \ 5 \ 2 \ 2$   
 $\begin{matrix} & 3 & & 3 & & 3 & & 3 \\ & 2 \ 4 & & 2 \ 5 & & 1 \ 4 & & 1 \ 5 \\ 1 & & 5 & 1 & 4 & 2 & 5 & 2 \ 4 \end{matrix}$

w/ 4 on top: 5 options bc 3 moving around

$14 + 14 + 5 + 4 + 5 = 42$  possible trees

Back to problem:

→  $2 \cdot 42 \cdot 5 = 420$   
possible trees

### Problem 5

C1: 3 nurses & 10 ppl  
 $10 - 3 = 7$  ppl

7 stars 2 bars  
 $10 \binom{9}{2} = 36$

C2: 4 nurses & 10 ppl  
 $10 - 4 = 6$  ppl  
6 stars 2 bars  
 $10 \binom{9}{6} = 84$

$$84 + 36 = \boxed{120}$$
